## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, and 3, drawn to a vinegar produced by adding sea water to cereals, classified in class 426, subclass 17.
- II. Claims 2 and 4-6, drawn to a vinegar produced by using an adding water that is added to a brewed material, classified in class 426, subclass 650.
- III. Claims 7-8, drawn to a seasoning liquid prepared by mixing vinegar with type of sea water, classified in class 426, subclass 650.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the have different modes of operation, i.e., the method by which they are prepared.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
